

Orphan Chemical Program

The Orphan Chemical Program is a service of EHS. We take unwanted chemicals that are in new or “like new” condition and offer them to other researchers on campus. EHS maintains a list of [Orphan Chemical List](#) online. This waste minimization program provides faculty members on campus with chemicals at no cost while keeping these chemicals from entering the environment as hazardous waste, again saving the University money.

To donate chemicals to the program, please contact EHS at 334-4357 for more information.

To request chemicals listed below please print out a copy of the [Orphan Chemical Acquisition Form](#) (PDF), fill out the form in its entirety, and send it to of EHS by campus mail. The chemical(s) and Material Safety Data Sheet(s) will be delivered to your location. If you have any questions concerning this program, please call EHS at 334-4357.
